

PIEDMONT ORTHOPEDIC SOCIETY

57th Annual Meeting

PIEDMONT ORTHOPEDIC FOUNDATION

Sea Island[®]

The Cloister
Sea Island, Georgia

May 6-10, 2009

Duke School of Medicine

Jointly Sponsored by the Duke University School of
Medicine and the Piedmont Orthopedic Society

GREETINGS FROM THE CO-CHAIRMEN

Welcome to the 57th Piedmont Orthopedic Society annual meeting at the Cloister at Sea Island. For some of you this will be your first visit since the renovations and for all of us it is the first visit since the pool and beach club areas have been completed. The Cloister has been the home of the Piedmont for over fifty years and we are proud to continue our association with the Cloister at this new facility. We know you will love the changes.

We are excited about the enthusiastic turnout and look forward to an exciting scientific program, to the renewal of old friendships, and the beginning of new ones. We are delighted that Tyson Jennette has been selected as our honored guest this year.

We are grateful to Muff and Jim Urbaniak for their advice and guidance in helping us plan this meeting and to Penny Howard for all of her efforts on behalf of the Piedmont Society.

Billy and Peggy Andrews

Greg and Madelyn Mencio

CME STATEMENTS

History

The Piedmont Orthopedic Society is a traditional organization of “life long learners” many of whom, because of their training and experience are classified as experts. The annual organizational meeting is an opportunity for these learners to conduct peer presentations, as well as to review and discuss many different topics. The 57 year history attests to the continued support of this notion of the members being “life long learners”. Additionally, through peer solicitation of topics for presentation, other assessment methods are used to discuss the material. Ongoing clinical and research presentations traditionally include epidemiological data derived from prevalence of a topic; geographic data based on specific health problems of regional importance; and morbidity and mortality statistics introduced as complications of specific procedures. Quality Assurance statistics (QA) and/or Peer Review Data will document the need to address complications of a particular topic. Non-academic based physicians bring patient care audits for clinical critique. Because the Society has evolved from Duke University Medical Center trained orthopedic physicians, the members who now may or may not be at academic institutions still look to their peers from Duke to provide information in many different areas.

Statement of Need

This meeting has been designed to update the Piedmont Orthopedic Society members’ knowledge and skills in selected areas of orthopedic surgery, and to encourage members to study and analyze their own practices.

Learning Objectives

At the conclusion of this activity, the participants should be able to:

- Identify new technical knowledge and skills in specific orthopedic procedures, which include trauma, spine, adult reconstruction, upper extremity, pediatrics, and foot and ankle;
- Describe prospective or retrospective studies in orthopedic surgery;
- Discuss outcomes and the research of others in their own field.

Target Audience

Orthopedic surgeons of the Piedmont Orthopedic Society.

Accreditation

This activity has been planned and implemented in accordance with the Essential Areas and Policies of the Accreditation Council for Continuing Medical Education through the joint sponsorship of the Duke University School of Medicine and the Piedmont Orthopedic Society. The Duke University School of Medicine is accredited by the ACCME to provide continuing medical education for physicians.

Credit Designation

The Duke University School of Medicine designates this educational activity for a maximum of 20 *AMA PRA Category 1 Credit(s)*[™]. Physicians should only claim credit commensurate with the extent of their participation in the activity.

Disclaimer

The information provided at this CME activity is for continuing medical education purposes only and is not meant to substitute for the independent medical judgment of a physician relative to diagnostic and treatment options of a specific patient's medical condition.

Unapproved Use Disclosure

Duke School of Medicine requires CME faculty (speakers) and/or planning committee members to disclose to the attendees:

- 1) When products or procedures being discussed are off-label, unlabeled, experimental, and/or investigational (not FDA approved); and
- 2) Any limitations on the information that is presented, such as data that are preliminary or that represent ongoing research, interim analyses, and/or unsupported opinion.

Faculty at this symposium may discuss information about pharmaceutical agents that is outside of U.S. Food and Drug Administration approved labeling. This information is intended solely for continuing medical education and is not intended to promote off-label use of these medications. If you have questions, contact the medical affairs department of the manufacturer for the most recent prescribing information.

Staff and Content Validation Reviewer Disclosure

The staff involved with this activity and any content validation reviewers of this activity have reported no relevant financial relationships with commercial interests.

Resolution of Conflicts of Interest

In accordance with the ACCME Standards for Commercial Support of CME, the Duke University School of Medicine implemented mechanisms, prior to the planning and implementation of this CME activity, to identify and resolve conflicts of interest for all individuals in a position to control content of this CME activity.

Instructions on How to Receive Credit

In order to receive credit for attending this symposium participants must review the CME information (learning objectives, accreditation, disclosure, etc.), attend the CME activity, and complete the CME Credit Attestation form (note: you may only claim those credits that you actually spent in the CME activity). CME Credit attestation forms must be completed

Participants will be emailed a Web address to fill out an online activity evaluation after the meeting has concluded in full and returned to the appropriate representative at the conclusion of the activity. A certificate of credit will be emailed or mailed to the requesting participant within eight weeks of receipt.

GUEST OF HONOR

A. Tyson Jennette, M.D.

Dr. Jennette was born January 27, 1934 in Henderson, NC. He graduated from Henderson High School in 1952, where he was an outstanding student and football and basketball letterman on championship teams. He graduated from Duke University in 1955 where he lettered in swimming. He married Peggy, also a Duke graduate in 1957. After graduating from UNC Medical School in 1959, he completed an internship and orthopaedic residency at Grady Memorial Hospital in Atlanta in 1964.

Tyson entered private practice in orthopaedic surgery in Wilson, NC in 1964. He was Chairman of the Department of Surgery at Wilson Memorial Hospital from 1969-1971. He was the team physician for Fike High School for nearly two decades and was President of the NC Orthopaedic Association in 1985. He was selected as the Honored Orthopaedic Surgeon of the NCOA in 2001. As a member of the American Orthopaedic Society for Sports Medicine, he has always maintained a strong involvement in athletics. He continues to be an avid active tennis player and skier.

For 45 years he has been an active contributor to our Duke Orthopaedic Residency Program. Soon after arriving in Wilson in 1964, he began attending the Wilson Crippled Children's Clinic with Dr. Baker and Dr. Bassett as well as attending Duke Orthopaedic Grand Rounds and teaching in Wednesday Duke Clinics. For more than four decades he has rarely missed Grand Rounds and more recently the annual Piedmont Society meetings. He was appointed Clinical Associate in Duke Orthopaedics in 1974 by Dr. Goldner and Chief of Orthopaedic Surgery at the Durham VA Hospital in 1992 by Dr. Urbaniak. He continues to serve as an Assistant Consulting Professor of the Durham VA Hospital, where he and the residents have shared a cordial and meaningful teaching and learning relationship.

Peggy and Tyson are the proud parents of two daughters Anne and Alyson and have five granddaughters.
